

2014 CANDLES AND LIGHTS

# INNOVATIONS

## LIGHTING TOMORROW

### The Inventor of the LED Candle, Reinventing LED Candles.

Liown focuses on product development, full service manufacturing and global distribution services. We believe there are no boundaries in the pursuit of creativity and, in fact, we create marketing demand through innovation in every layer of the birth of a new product.

We serve customers who need end-to-end production of their product from concept development and schematic electro circuit design to component production and systematic product assembly.

By achieving our core beliefs on a daily basis, we are able to enjoy a global reach that influences the world. With an understanding of our customers, consumers and the marketplace we build long lasting relationships and together we enjoy a better life through innovation.

# Design

When we begin a new product design, we take into account the entire lifecycle of the product. From the birth of a concept, through design, manufacturing, utilization of the product to finally the disposal or recycling of the product, we consider how best to achieve innovation and the market demand for it as well as lessening the environmental impact of the product.

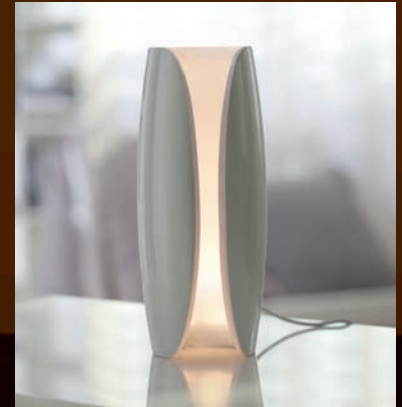

We focus on collaborative thinking to achieve the highest level of creativity as possible. We combine science and technology with society and nature to create products that are practical, useful, beautiful and meet the demands of consumers.

We start by listening to our customers to learn what it is they want to produce and then we propose creative solutions that will fulfill the needs of consumers as well as ensure market share for our customers. We offer only the newest technology for unique products that never sacrifice function. Further capabilities include product troubleshooting, market analysis, mock-up samples (tooled and hand made) and much more.

We own more than 230 Chinese and Global patents in a variety of technologies that we use in new product development.

- Electronic/Flameless candles
- LED lighting technology
- Electromagnetic technology
- Wireless technology
- Solar technology and more

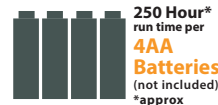

# Candles

## MOVING FLAME™ PILLARS – INDOOR

Enjoy the beauty of a real candle without any of the mess. Our Moving Flame™ pillars capture the essence of a real wick burning candle, emulating the dancing nature of the flame and providing the fragrance of a real wax candle. Our Moving Flame™ pillars are made with 100% refined paraffin wax, it looks so incredibly realistic you'll try and put it out! Perfect for home decor with our line of colors and textures to match any style.

Moving Flame™ technology creates a visible realistic faux flame that dances like a real flame. The random movement is virtually indistinguishable from a real wick burning candle.

- 150+ Hours of run time (2AA batteries); option to upgrade to 4AA batteries with 250+ Hours of run time
- On/Off and 5 hours auto timer feature
- Plastic pillar option is available
- Multitude of texture and color options
- Remote feature add-on available
- Safe near children and pets

## Indoor Moving Flame™

Global patented moving flame technology.

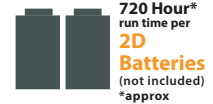

# Outdoor Moving Flame™

## MOVING FLAME™ PILLARS – OUTDOOR

With our New Outdoor Moving Flame™ pillars, you can now enjoy realistic candle lighting outdoors without worrying about the elements. It is built to endure any climate without malfunction. Moving Flame™ Outdoor Pillars feature a drainage system to reroute water away from the LED within a certified plastic shell.

- 720+ Hours of run time (2D batteries)
- On/Off and 8 hours auto timer feature
- Remote feature
- Water and weather resistant (IPX4 certified)

Global patented moving flame technology.

# Indoor Moving Flame™

## MOVING FLAME™ TAPERS - INDOOR

Enjoy the beauty of a real candle without any of the mess. Our Moving Flame™ Tapers capture the essence of a real wick burning taper, emulating the dancing nature of the flame. Our Moving Flame™ Tapers are available in plastic and wax dipped versions, perfect for home decor with our line of colors and textures to match and style.

Moving Flame™ technology creates a visible realistic faux flame that dances like a real flame. The random movement is virtually indistinguishable from a real wick burning taper.

- 150+ Hours of run time (2AA batteries)
- On/Off and 5 hours auto timer feature
- Available in either plastic or wax dipped version
- Safe near children and pets

Taper holders also available.

Global patented moving flame technology.

## MOVING FLAME™ NIGHTLIGHT

Using the same Moving Flame™ technology, the Moving Flame™ nightlight is a plug in lighting solution with the same realistic movement. It utilizes the electromagnetic performance found in our moving flame candles but with the convenience of 110V wall socket. Perfect to illuminate hallways and rooms needing automated ambiance provided by a nightlight. Integrates beautifully in any home décor with a variety of finish colors to match any style.

- Plugs into wall socket
- Auto on/off light sensor and master on/off switch
- Safe near children and pets

## TruFlame® PILLARS – INDOOR

Our TruFlame® technology creates a rolling effect of light, emulating the natural flickering of a real burning flame. The way our light dances is indiscernable to any pattern or program with the naked eye. Our design maximizes lux output and minimizes our battery consumption for latent functions such as timer or remote features.

- Utilizes Truflame® technology for a realistic flickering light, and a soothing candle-like glow
- 800+ Hours of Run Time (Uses 4AA Batteries)
- 500+ Hours of Run Time (Uses 2AA Batteries)
- On/Off and 4, 6 or 8 hour auto timer features
- 100% refined paraffin wax
- Multitude of texture options

# Commercial

---

## RECHARGEABLE SYSTEMS

The rechargeable systems that changed everything. For over 6 years our Commercial systems have been at the core of what we represent. Tried and true, these systems provide reliability, quality and durability all while providing that safe flickering ambience you'd expect from Liown.

## LOW VOLT CANDLE SYSTEMS

Our flameless LED candles find a home in a wired version that offers you the ability to run up to 96 candles in succession using a standard wall outlet. With three built in timer settings and easy wiring, the possibilities are endless.

# Lighting

---

Soft comforting light for every room in your home.

Liown Electronics Co. is an exclusive licensee of Energizer brand products. Utilizing our LED technology to further compliment the trusted Energizer brand, we develop and manufacture nightlights to the same quality expected with Energizer's leadership in the portable lighting industry that spans over 110 incredible years.
