BETTER LIVING THROUGH INNOVATION

Since 1999, Liown has been leading the LED revolution as the unparalleled LED candle and lighting manufacturer. In 2009 we were the first to add motion to our LED candles with our Moving Flame™ line. Now, after years of success in developing patents and perfecting our manufacturing processes, Liown is entering a new era of product design and development in our ongoing pursuit of enjoying better living through innovation.

At Liown, we believe boundaries are non-existent in the pursuit of innovation. Through every layer of new product development, we bring experience, creativity and curiosity to create truly distinctive products that have an inherent marketplace demand built into them.

In addition to design, manufacturing, sourcing and logistics, Liown collaborates with outside international distribution, marketing and product development services to achieve vital time-to-market solutions. Liown specializes in electronics, hardware/software and industrial design. Liown is vertically integrated with five factories that provide a turnkey source to serve customers in need of end-to-end product production.

Mercury glass taper holders are available for purchase.

THE CANDLE.

REFINED FOR CENTURIES. REDEFINED BY LIOWN.

Over hundreds of years the candle has transformed along with new discoveries and inventions. Where once it was made of simple tallow and a tuft of material it gradually evolved into slow burning wicks and wax.

Then one company revolutionized the candle.

In 1999, Liown used LED light to create the first candle with no mess or hazard. Customers immediately embraced it as the new candle for the 21st century. But at Liown we don't stop at just redefining a product. We continue to evolve the technology inside all our candles to make them even more beautiful and extraordinarily functional.

Learn more about the latest and biggest developments in the LED candle industry.

MOVING FLAME™

MOVING FLAME™ CANDLES – AA

Global Patented Moving Flame™ Technology

This is the candle that started a revolution in LED flames with motion. Liown's Moving Flame™ technology creates a visible and natural simulated flame that dances like a traditional flame without the hazard or mess. The random movement is virtually indistinguishable from a wick-burning candle. And because our candles are made with 100% refined paraffin wax they provide the same pleasing fragrance of traditional candles. Our extensive line of color and texture selection will match any style of decor.

250+ hours of run time
(2AA batteries); option
to upgrade to 4AA
batteries with 400+
hours of run time

On/Off and 5 hour
auto-timer feature

Plastic pillar
option available

Full range of texture
and color options

Remote feature
add-on available

Safe near children
and pets

2AA and 4AA MOVING FLAME™

MOVING FLAME™ TAPERS and VOTIVES – AA

250+ hours of run time (2AA batteries)

On/Off and 5 hour auto-timer feature

Available in either plastic or wax dipped versions

Remote feature add-on available

Safe near children and pets

Enjoy the beauty of light from candlesticks or a candelabra without the hazard or mess of traditional candles. Liown's Moving Flame™ tapers capture the essence of traditional wick burning candles, emulating the motion of a flame, and are available in plastic and wax dipped versions. The Moving Flame™ Votives provide ambiance in small or intimate settings. The extensive color selection of our tapers and votives will match any style of decor.

MOVING FLAME™ PILLARS – C and D

Global Patented Moving Flame™ Technology

Larger spaces call for bigger candles. Liown's Moving Flame™ pillars provide the essence of traditional wick burning candles but without the hazard or mess. And because our pillars are made with 100% refined paraffin wax they provide the same pleasing fragrance of traditional candles. Our extensive line of color and texture selection will match any style of decor.

500+ hours of run time
(2 C batteries or
2 D batteries)

On/Off and 5 hour
auto-timer feature

Full range of texture
and color options

Remote feature
add-on available

Safe near children
and pets

MOVING FLAME™ – RECHARGEABLE

Available in 4 or 12 pack

17 hour run time

On/Off and 5 hour auto-timer

8 hour charging time

Lithium Ion batteries

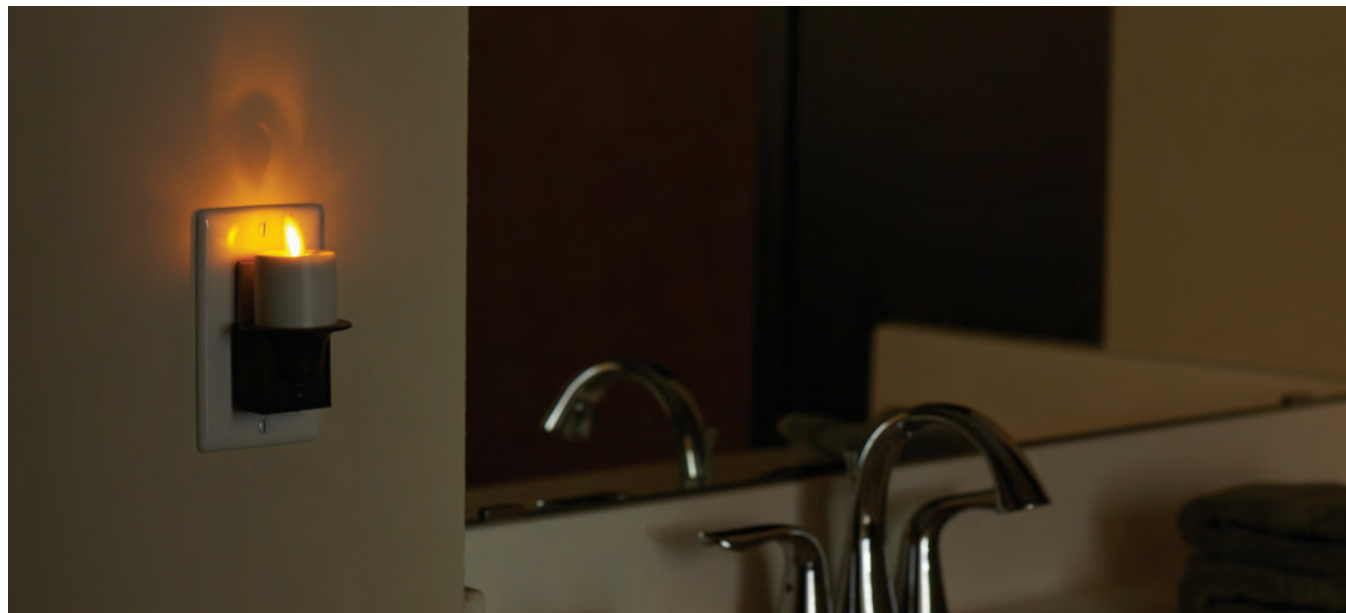

Remote feature
add-on available

Lioun offers a rechargeable candle system featuring our unrivaled Moving Flame™ technology. It creates a mess-free and hazard-free ambiance that is becoming the standard in commercial settings. The tray light glows green when the candles are fully charged and it glows red when they are recharging. Additional trays can be linked for ease of use and simple organization (12 pack tray only).

MOVING FLAME™ NIGHTLIGHT

Global Patented Moving Flame™ Technology

Liown's Moving Flame™ nightlight utilizes the electromagnetic performance found in our Moving Flame™ candles, but with the convenience of a 110V wall socket. Ideal for illuminating hallways and rooms needing automated ambiance provided by a traditional nightlight. Our variety of finishes integrates beautifully into any style of decor.

Plugs into wall socket
(North American, European,
and Australian standards available)

Auto on/off light sensor and
master on/off switch

Safe near children and pets

{ w 2.15 x h 2.8 x d 2 }

TRUFLAME® CANDLES

Global Patented TruFlame® Technology

Liown's TruFlame® technology creates the natural flickering of a traditional burning flame for a soothing candlelit glow. Years of research and development have incorporated three LEDs into one, creating the perfect balance of color, light and flicker, making TruFlame® the most realistic-looking flame on the market today. TruFlame® and its enhanced patented LED technology forces the light to glow from the outside of the candle, creating the breathtaking ambiance you have come to expect from Liown. With three timer settings you can easily control the atmosphere of your environment.

PUSHBUTTON™ – 2AA and 4AA

800 hours of run time (4AA batteries)

On/Off and 5 hour auto-timer feature which turns the candle on and off at the same time every day

Indoor or covered outdoor use

Safe near children and pets

{ 4 x 8 }

{ 4 x 4 }

{ 3 x 3 }
2AA Driver Only

{ 3 x 4 }

{ 3 x 6 }

{ 3 x 8 }

Nothing is simpler when lighting a candle than a push of a button at the top of it. Liown's patented PushButton™ technology offers a realistic flicker effect with illumination above and below the surface of the candle. The five-hour timer automatically turns the candle off and turns it on again at the same time the next day. The sturdy wax shell is made of unscented, drip free 100% paraffin wax and is for indoor or covered outdoor use.

Simply push the button on or off.

OUTDOOR CANDLES

All of our outdoor candles are completely sealed and made from materials that protect them from extreme outdoor exposure, including rain, wind and sun. The unique drainage system allows pooled rainwater to move directly through the candle, keeping the candle's LED and electronics safe and dry, providing a long life that functions beautifully.

MOVING FLAME™ DD

Liown's Outdoor Moving Flame™ pillars provide a flame that you can see flickering in the twilight but is never extinguished by rain, wind, sleet or snow during a gusty evening.

720+ hours of run time

On/Off and 8 hour auto-timer

Remote feature

Water and weather resistant (IPX4 certified)

TRUFLAME® DD

TruFlame® technology incorporates three LEDs into one, creating the perfect balance of color, light and flicker, making TruFlame® the most realistic looking flame on the market today.

1000+ hours of run time

On/Off and 8 hour auto-timer

Remote feature

Water and weather resistant (IPX4 certified)

1 LED 2AA

The natural flickering of the Outdoor 1 LED is controlled by a switch located at the bottom of the candle and a timer turns the candle on at the same time every day for four hours.

300+ hours of run time

On/Off and 4 hour auto-timer

Water and weather resistant (IPX4 certified)

DESIGN YOUR OWN CUSTOMIZED CANDLES

Whatever combination of color, texture and finish our customers desire, we can create a truly unique candle. Through extensive product development and anticipation of consumer trends, we'll match the design needs of our customers.

WHAT'S NEXT

Liown created the flameless wax candle category when we invented the first LED candle. After several major improvements on our first idea including Truflame and Moving Flame, we are introducing another innovative new flame that once again redefines the category.

Viewed from any angle, this flame is the most realistic flicker ever invented. It's never affected by even the harshest weather conditions and, like with all our candles, it provides a safe yet stunning ambiance.

WE WOULD LIKE YOU TO SEE IT.
Please contact Liown for a private showing.
